Block practice · Logarithms, indices and surds

Work through each question type in order. Each section has a worked-example retry and all further practice. Attempt only the part outlined in red.

Simultaneous equations with powers and logs

OLevels.com SCHOOL

Practice workbook · Simultaneous equations with powers and logs

Turning a pair of index and log equations into ordinary algebraic equations in x and y and solving them together.

6 question parts: 1 worked-example retry and 5 further practice parts.
Name: _____ Class: _____ Date: _____

Practise one question type at a time. Attempt the part inside the red boundary; the rest of the question and any figures are kept for context. Write your working in the answer space.

The first question is a retry of the website worked example, without its solution. Check your answers online with 'Check my answer', or ask your teacher for the answer booklet.

Type ID: FPM-LOG-12

1. Question 9 · part whole · 8 marks

2023 JAN · Paper 01

Worked-example retry · Attempt part whole only.

9 Giving each value in your solution to 2 decimal places, solve the simultaneous equations

$$e^{2y} - x + 2 = 0$$

$$\ln(x + 3) - 2y - 1 = 0$$

2. Question 10 · part b · 9 marks

2023 JAN · Paper 02 (regional R)

Further practice · Attempt part b only.

10 (a) Show that $\frac{9^{3y}}{243} = 3^{(6y-5)}$

(4)

(b) Solve the simultaneous equations

$$\frac{9^{3y}}{243} = 27^{(x-2)}$$

$$\log_{10}\sqrt{6xy} = \log_4 2$$
