Practice workbook · Turning sums of trig terms into products, and products into sums

Adding or subtracting two addition formulae to turn a product of trig functions into a sum, or a sum into a product.

8 question parts: 1 worked-example retry and 7 further practice parts.
Name: _____ Class: _____ Date: _____

Practise one question type at a time. Attempt the part inside the red boundary; the rest of the question and any figures are kept for context. Write your working in the answer space.

The first question is a retry of the website worked example, without its solution. Check your answers online with 'Check my answer', or ask your teacher for the answer booklet.
