Practice workbook · Regions made by tangents and a sector

Regions formed by tangents to a circle and a sector, using the right angle between radius and tangent to find lengths and angles.

6 question parts: 1 worked-example retry and 5 further practice parts.
Name: _____ Class: _____ Date: _____

Practise one question type at a time. Attempt the part inside the red boundary; the rest of the question and any figures are kept for context. Write your working in the answer space.

The first question is a retry of the website worked example, without its solution. Check your answers online with 'Check my answer', or ask your teacher for the answer booklet.

1. Question 4 · part whole · 6 marks

2020 JAN · Paper 01

Worked-example retry · Attempt part whole only.

4

Diagram **NOT** accurately drawn

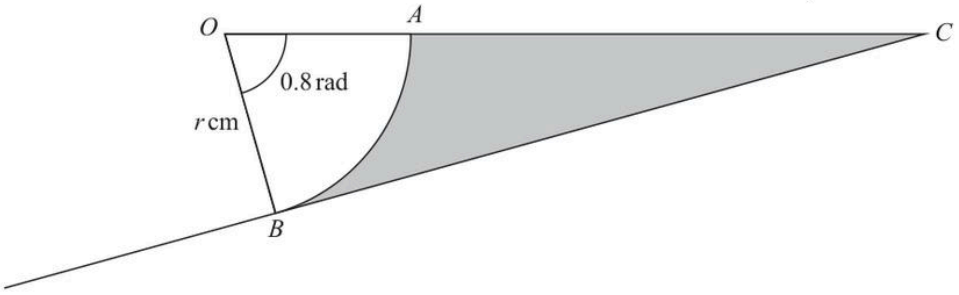

Figure 1

Figure 1 shows a sector AOB of a circle with centre O and radius r cm and a triangle BOC.
The angle of sector AOB is 0.8 radians.
The points O, A and C lie on a straight line so that CB is the tangent to the circle at B.

Given that the area of the shaded region in Figure 1 is 101 cm^2, find the value of r.
Give your answer correct to 3 significant figures.

Diagram **NOT** accurately drawn

Figure 2

In Figure 2, AB and AC are tangents to a circle with centre O and radius r cm.

The points B and C lie on the circle so that OBC is a sector of this circle and $\angle BOC = \frac{2\pi}{3}$ radians.

Given that the area of the shaded region is $10\,\text{cm}^2$,

find, to 3 significant figures, the value of r. **(8)**

3

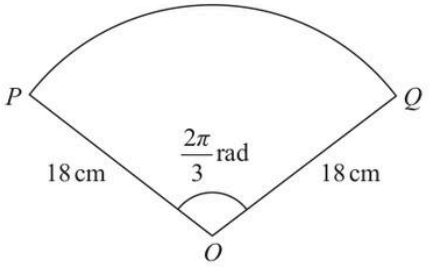

Diagram **NOT** accurately drawn

Figure 1

Figure 1 shows a sector OPQ of a circle with centre O.

The radius of the circle is 18 cm and the angle POQ is $\frac{2\pi}{3}$ radians.

(a) Find the length of the arc PQ, giving your answer as a multiple of π

(2)

Figure 2 below shows the sector OPQ and the kite $OPTQ$.

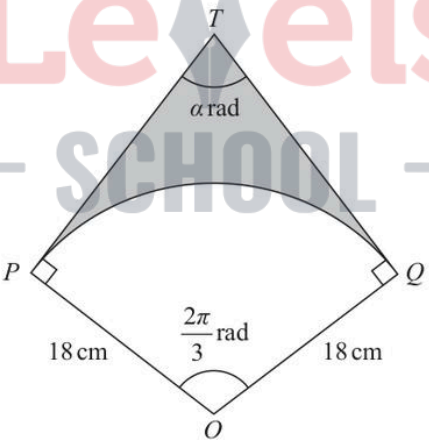

Diagram **NOT** accurately drawn

Figure 2

PT is the tangent to the circle at P and QT is the tangent at Q, such that angle $PTQ = \alpha$ radians.

(b) (i) Find α in terms of π

(1)

(ii) Calculate, to 3 significant figures, the area of the region, shown shaded in Figure 2, which is bounded by the arc PQ and the tangents PT and QT.
